

CONTENTS OF VOLUME 7

- Abram, D. and Gibbons, N. E.** The effect of chlorides of monovalent cations, urea, detergents, and heat on morphology and the turbidity of suspensions of red halophilic bacteria, 741.
- Alexander, M.** See Lange, R. T., 959; Marshall, K. C., 955.
- Amies, C. R.** Loss of immunogenic properties of vaccinia virus inactivated by formaldehyde, 141.
- Anderson, A. W.** See Duryee, F. L., 799.
- Audette, R. C. S., Baxter, R. M., and Walker, G. C.** A study of the lipid content of *Trichophyton mentagrophytes*, 282.
- Bailey, W. R.** See Glynn, J. P., 907, 915.
- Bailey, W. R. and Glynn, J. P.** Lysogeny in enteropathogenic *Escherichia coli*. I. General characteristics of bacteriophages isolated from O26:B6 and O111:B4 serotypes, 901.
- Baker, G. E.** See Potter, L. F., 595.
- Bakerspigel, A.** Haplomycosis (Adiaspiromycosis) in *Sorex*, 676.
- Barnes, E. H. and Williams, E. B.** The role of phloridzin in the host-parasite physiology of the apple scab disease, 525.
- Bates, J. L.** See Liu, P. V., 107.
- Baxter, R. M.** See Audette, R. C. S., 282.
- Beskid, G. and Lundgren, D. G.** Biochemical changes occurring in a minimal medium during growth and sporulation: Comparison of sporogenic *Bacillus cereus* with asporogenic mutants, 543.
- Bird, F. T.** The development of *Tipula* iridescent virus in the crane fly, *Tipula paludosa* Meig., and the wax moth, *Galleria mellonella* L., 827.
- Blakley, E. R. and Ciferri, O.** Oxidation of gluconate, 2-deoxy-D-glucose, and lactic acid by an enzyme preparation from *Aerobacter aerogenes*, 61.
- Bleiweis, A. S. and Zimmerman, L. N.** Formation of two types of osmotically fragile bodies from *Streptococcus faecalis* var. *liquefaciens*, 363.
- Blumenthal, H. J.** See Goldman, M., 677.
- Bollen, W. B. and Wright, E.** Microbes and nitrates in soils from virgin and young-growth forests, 785.
- Borrow, A., Jefferys, E. G., Kessell, R. H. J., Lloyd, E. C., Lloyd, P. B., and Nixon, I. S.** The metabolism of *Gibberella fujikuroi* in stirred culture, 227.
- Boudreault, A. and Pavilania, V.** Relations entre les propriétés cytopathogéniques, hémadsorbantes et hémagglutinantes du virus de l'influenza, 347.
Étude du virus de l'influenza: antigénicité de souches grippales adaptées à des cultures de tissus, 467.
- Bretz, H. W.** Death of *Escherichia coli* frozen on cellophane and on membrane filters, 793.
- Bucher, G. E.** Artificial culture of *Clostridium brevifaciens* n. sp. and *C. malacosomae* n. sp., the causes of brachytosis of tent caterpillars, 641.
- Burton, A. N., Connell, R., Rempel, J. G., and Gollop, J. B.** Studies on Western equine encephalitis associated with wild ducks in Saskatchewan, 295.
- Bynoe, E. T.** See Tennant, A. D., 733.
- Campbell, J. J. R.** See Strasdine, G. A., 91.
- Campbell, J. N.** See Strasdine, G. A., 91.
- Capriotti, A.** *Torulopsis variouaerai* sp. nov. A new yeast isolated from Finnish soil, 681.
- Cater, J. C. and Redmond, W. B.** Isolation of and studies on bacteriophage active against mycobacteria, 697.
- Chan, E. C. S. and Katznelson, H.** Growth interactions of *Arthrobacter globiformis* and *Pseudomonas* sp. in relation to the rhizosphere effect, 759.
- Chesbro, W. R.** Lysozyme and the production of osmotic fragility in enterococci, 952.
- Chu, Y.-c.** See Grula, E. A., 27.
- Ciferri, O.** See Blakley, E. R., 61.
- Clark, D. S. and Lentz, C. P.** Submerged citric acid fermentation of sugar beet molasses: Effect of pressure and recirculation of oxygen, 447.
- Clement, M. T.** Effects of freezing, freeze-drying, and storage in the freeze-dried and frozen state on viability of *Escherichia coli* cells, 99.
- Cleverdon, R. C.** See Girard, A. E., 407.
- Colvin, J. R.** See Millman, B., 383.
- Connell, R.** See Burton, A. N., 295.
- Costerton, J. W. F., Murray, R. G. E., and Robinow, C. F.** Observations on the motility and the structure of *Vitreoscilla*, 329.
- Cousineau, J. G. and McKiel, J. A.** In vitro sensitivity of *Leptospira* to various antimicrobial agents, 751.

- Crisley, F. D. and Helz, G. E.** Some observations of the effect of filtrates of several representative concomitant bacteria on *Clostridium botulinum* type A, 633.
- Deal, S. J. and Lichstein, H. C.** Malic enzyme induction by lactic acid bacteria. I. A method for the study of nutritional interactions, 153.
- Delwiche, E. A.** See Yousten, A. A., 889.
- DeMoss, R. D.** See Unger, L., 844.
- Dempster, G.** See Grodums, E. I., 175.
- Dempster, G., Grodums, E. I., and Spencer, W. A.** Experimental Coxsackie B-3 infection in the hibernating squirrel and bat, 587.
- Domnas, A.** Amide metabolism in yeast. III. Aliphatic amide metabolism in *Candida utilis*, 657.
- Drobník, J.** Primary oxidation of some organic compounds in remoistened air-dried soil, 769.
- Duerre, J. A. and Lichstein, H. C.** Malic enzyme induction by lactic acid bacteria. II. Purine and pyrimidine requirements, 217.
- Durham, N. N. and Leach, K.** Inhibition of a microbial glucose-6-phosphate dehydrogenase by diethylstilbestrol, 75.
- Duryee, F. L., Raj, H. D., Wang, C. H., Anderson, A. W., and Elliker, P. R.** Carbohydrate metabolism in *Micrococcus radiodurans*, 799.
- Elkan, G. H.** A nodulation-inhibiting root excretion from a non-nodulating soybean strain, 851.
- Elliker, P. R.** See Duryee, F. L., 799.
- Erdman, I. E., Thatcher, F. S., and MacQueen, K. F.** Studies on the irradiation of microorganisms in relation to food preservation. I. The comparative sensitivities of specific bacteria of public health significance, 199.
- Studies on the irradiation of microorganisms in relation to food preservation. II. Irradiation resistant mutants, 207.
- Erwin, D. C. and Katznelson, H.** Studies on the nutrition of *Phytophthora cryptogea*, 15.
- Suppression and stimulation of mycelial growth of *Phytophthora cryptogea* by certain thiamine-requiring and thiamine-synthesizing bacteria, 945.
- Evelyn, T. P. T. and McDermott, L. A.** Bacteriological studies of fresh-water fish. I. Isolation of aerobic bacteria from several species of Ontario fish, 375.
- Ewing, W. H. and Johnson, J. G.** Intersubgroup and intrasubgroup antigenic relationships within the genus *Shigella*: subgroup A, 303.
- Farkas-Himsley, H.** Effect of anaerobiosis on the emergence of streptomycin-resistant bacteria, 411.
- Fredette, V.** See Martineau, B., 671.
- Gadebusch, H. H. and Johnson, J. D.** Specific degradation of *Cryptococcus neoformans* 3723 capsular polysaccharide by a microbial enzyme. I. Isolation, partial purification, and properties of the enzyme, 53.
- Gershman, M.** Use of a tetrazolium salt for an easily discernible KCN reaction, 286.
- Gershon, D.** Genetic studies of effective nodulation in *Lotus* spp., 961.
- Gibbons, N. E.** See Abram, D., 741; Kates, M., 427.
- Gibbons, N. E. and Payne, J. I.** Relation of temperature and sodium chloride concentration to growth and morphology of some halophilic bacteria, 483.
- Girard, A. E. and Cleverdon, R. C.** A staining procedure for the flagella of some agarolytic bacteria, 407.
- Glynn, J. P.** See Bailey, W. R., 901.
- Glynn, J. P. and Bailey, W. R.** Lysogeny in enteropathogenic *Escherichia coli*. II. Characterization of *E. coli* bacteriophage D-1, 907.
- Lysogeny in enteropathogenic *Escherichia coli*. III. The effects of temperature and chloramphenicol on the lysogeny of D-1 phage-infected cells, 915.
- Goldman, M. and Blumenthal, H. J.** Arrest of bacterial spores in stages of postgerminative development, 677.
- Goldner, M.** See Rhodes, H. K., 355.
- Goldner, M. and Wilson, R. J.** Preparation of cell-free staphylococcal penicillinase concentrate, 45.
- Gollop, J. B.** See Burton, A. N., 295.
- Gordon, R. E. and Mihm, J. M.** The specific identity of *Jensenia canicruria*, 108.
- Gorham, P. R.** See McLachlan, J., 869.
- Gorin, P. A. J.** See Spencer, J. F. T., 185.
- Graf, G.** See Martin, M. E., 341.
- Gregory, J.** See Tanner, C. E., 473.
- Grodums, E. I.** See Dempster, G., 587.
- Grodums, E. I. and Dempster, G.** Encephalitis in experimental coxsackie B-3 infection, 175.

- Grula, E. A., Luk, S.-k., and Chu, Y.-c.** Chemically defined medium for growth of *Micrococcus lysodeikticus*, 27.
- Hagen, P.-O., and Rose, A. H.** A psychrophilic *Cryptococcus*, 287.
- Hauschild, A. H. W. and Pivnick, H.** Continuous culture of *Brucella abortus* S. 19, 491.
- Hawirko, R. Z. and Wong, F. C. C.** Active components of antiglobulin sera reacting with red cells sensitized with natural and immune anti-A haemagglutinins, 189.
- Hay, G. W., Westlake, D. W. S., and Simpson, F. J.** Degradation of rutin by *Aspergillus flavus*. Purification and characterization of rutinase, 921.
- Helz, G. E.** See Crisley, F. D., 663.
- Henderson, V. E. and Katznelson, H.** The effect of plant roots on the nematode population of the soil, 163.
- Henis, Y., Keller, P., and Keynan, A.** Inhibition of fungal growth by bacteria during cellulose-decomposition, 857.
- Herr, L. J., Weaver, C. R., and Horst, R. K.** A soil dilution procedure applicable to rhizosphere microorganism assays, 277.
- Hochster, R. M. and Nozzolillo, C. G.** The breakdown of ribonucleosides in extracts of the phytopathogenic organism *Xanthomonas phaseoli*, 389.
- Hogenkamp, H. P. C.** See Strasdine, G. A., 91.
- Horst, R. K.** See Herr, L. J., 277.
- Howlett, W.** See Mandels, M., 957.
- Ibanez, M. L. and Lindstrom, E. S.** Comparative studies with the photooxidase of *Rhodospirillum*, 85.
- Isa, J. M.** See Savage, A., 677.
- Jefferys, E. G.** See Borrow, A., 227.
- Johnson, J. D.** See Gadesbusch, H. H., 53.
- Johnson, J. G.** See Ewing, W. H., 303.
- Juhasz, S. E.** Fusion of granules of mycobacteria and its possible genetic significance, 832.
- Kates, M., Sehgal, S. N., and Gibbons, N. E.** The lipid composition of *Micrococcus halodenitrificans* as influenced by salt concentration, 427.
- Katznelson, H.** See Chan, E. C. S., 759; Erwin, D. C., 15, 945; Henderson, V. E., 163.
- Katznelson, H. and Strzelczyk, E.** Studies on the interaction of plants and free-living nitrogen-fixing microorganisms. I. Occurrence of *Azotobacter* in the rhizosphere of crop plants, 437.
- Kelen, A. E.** See Labzoffsky, N. A., 715.
- Keller, P.** See Henis, Y., 857.
- Kessell, R. H. J.** See Borrow, A., 227.
- Keynan, A.** See Henis, Y., 857.
- Khan, A. W. and Walker, T. K.** Fat production from cane molasses by *Penicillium spinulosum*: A study on substances in cane molasses interfering with fat production, 895.
- Kingscote, B.** Use of catalase in the culture of *Vibrio fetus*, 951.
- Kuehn, H. H.** See Zajic, J. E., 119; 807.
- Labzoffsky, N. A. and Kelen, A. E.** New complement fixing antigen for serodiagnosis of gonorrhoea, 715.
- Lange, R. T. and Alexander, M.** Anomalous infections by *Rhizobium*, 959.
- Lata, M.** See Sanwal, B. D., 319.
- Leach, K.** See Durham, N. N., 75.
- Ledingham, G. A.** See Reisener, H. J., 865.
- Lentz, C. P.** See Clark, D. S., 447.
- Lesley, S. M.** Degradation of the polysaccharide of *Xanthomonas phaseoli* by an extracellular bacterial enzyme, 815.
- Lichstein, H. C.** See Deal, S. J., 153; Duerre, J. A., 217.
- Lindblom, G. P.** See Lupton, M. D., 831.
- Lindstrom, E. S.** See Ibanez, M. L., 85.
- Liu, P. V. and Bates, J. L.** An extracellular haemorrhagic toxin produced by *Listeria monocytogenes*, 107.
- Lloyd, E. C.** See Borrow, A., 227.
- Lloyd, P. B.** See Borrow, A., 227.
- Luk, S.-k.** See Grula, E. A., 27.
- Lundgren, D. G.** See Beskid, G., 543.
- Lupton, M. D., Whitlock, D. W., and Lindblom, G. P.** A simple technique for freeze-drying anaerobes, 831.
- McConnell, W. B.** See Reisener, H. J., 865.
- McDermott, L. A.** See Evelyn, T. P. T., 375; Musgrave, A. J., 842.
- McDonald, I. J.** Proteinase production in relation to growth of a *Micrococcus* species, 111.
- McKiel, J. A.** See Cousineau, J. G., 751.

- McLachlan, J.** The effect of salinity on growth and chlorophyll content in representative classes of unicellular marine algae, 399.
- McLachlan, J. and Gorham, P. R.** Growth of *Microcystis aeruginosa* Kütz. in a precipitate-free medium buffered with TRIS, 869.
- MacQueen, K. F.** See Erdman, I. E., 199, 207.
- MacRae, I. C.** See Skerman, V. B. D., 169.
- Madhosingh, C.** The metabolic detoxication of 2,4-dinitrophenol by *Fusarium oxysporum*, 553.
- Mandels, M.** See Reese, E. T., 309.
- Mandels, M., Howlett, W., and Reese, E. T.** Natural inhibitors of cellulase, 957.
- Marshall, K. C. and Alexander, M.** Fungi active in heterotrophic nitrification, 955.
- Martin, M. E., Wayman, M., and Graf, G.** Fermentation of sulphite waste liquor to produce organic acids, 341.
- Martineau, B. and Fredette V.** A simplified method for determining the sensitivity of anaerobic bacteria to antibiotics, 671.
- Mattman, L. H., Tunstall, L. H., and Rossmore, H. W.** Induction and characteristics of staphylococcal L forms, 705.
- Meerovitch, E.** Growth of *Entamoeba invadens* in organotypic cultures of embryonic chick intestine, 685.
- Mihm, J. M.** See Gordon, R. E., 108.
- Millman, B. and Colvin, J. R.** The formation of cellulose microfibrils by *Acetobacter xylinum* on agar surfaces, 383.
- Monro, H. A. U.** See Musgrave, A. J., 280.
- Murray, R. G. E.** See Costerton, J. W. F., 329.
- Musgrave, A. J. and McDermott, L. A.** Some media used in an attempt to isolate and culture the mycetomal microorganisms of *Sitophilus* weevils, 842.
- Musgrave, A. J., Monro, H. A. U., and Uptis, E.** Apparent effect on the mycetomal microorganisms of repeated exposure of the host insect, *Sitophilus granarius* (L.) (Coleoptera), to methyl bromide fumigation, 280.
- Nakamura, M. and Pitsch, B. L.** Effect of size of inocula on the growth of *Shigella sonnei* in a chemically defined medium, 848.
- Newton, J. D.** See Paul, E. A., 7.
- Nixon, I. S.** See Borrow, A., 227.
- Nozzolillo, C. G.** See Hochster, R. M., 389.
- Parag, Y.** Sensitivity of *Schizophyllum commune* to chemical toxicants, 838.
- Parrish, F. W.** See Reese, E. T., 309.
- Paul, E. A. and Newton, J. D.** Studies of aerobic non-symbiotic nitrogen-fixing bacteria, 7.
- Pavilanis, V.** See Boudreault, A., 347, 467.
- Payne, J. I.** See Gibbons, N. E., 483.
- Perry, J. J.** The effect of fatty acids on growth and antibiotic production by *Streptomyces*, 777.
- Peterson, E. A.** Observations on the influence of plant illumination on the fungal flora of roots, 1.
- Pickett, M. J.** See Rauch, H. C., 125.
- Pitsch, B. L.** See Nakamura, M., 848.
- Pivnick, H.** See Hauschild, A. H. W., 491.
- Polley, J. R.** Preparation of non-infective soluble antigens with gamma radiation, 135.
Factors influencing inactivation of infectivity and hemagglutinin of influenza virus by gamma radiation, 535.
- Potter, L. F., and Baker, G. E.** The role of fish as conveyors of microorganisms in aquatic environments, 595.
- Quadling, C.** See Takahashi, I., 455.
- Rahman, A. K. M. M.** See Unger, L., 844.
- Raj, H. D.** See Duryee, F. L., 799.
- Rauch, H. C. and Pickett, M. J.** *Bordetella bronchiseptica* bacteriophage, 125.
- Redmond, W. B.** See Cater, J. C., 697.
